Applicant's declaration concerning RF Radiation Exposure

We hereby indicate that the product
Product description: IP Set top box
Model No: Onair+ SBB

The equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The integral antennas used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter within the host device.

A safety statement concerning minimum separation distances from enclosure of the
Product : IP Set top box
will be integrated in the user's manual to provide end-users with transmitter operating
conditions for satisfying RF exposure compliance.

The appropriate information can be drawn from the test report no: W6M21307-13349-C-1
and the accompanying calculations.

Company: VDA MULTIMEDIA SPA
Address: Viale Lino Zanussi, 3, 33170 Pordenone (PN) - Italy

Date: July 16, 2013

Worldwide Testing Services(Taiwan) Co., Ltd.

Registration number: W6M21307-13349-FCC
FCC ID: Q7A66000W00

3.2 Equivalent isotropic radiated power

FCC Rule: 15.247(b)(3)

EIRP = max. conducted output power + antenna gain (Directional gain)

$$\begin{aligned} \text{EIRP} &= 23.45 \text{ dBm} + 4.9 \text{ dBi} \\ &= 28.35 \text{ dBm} \end{aligned}$$

Limit: EIRP = +36 dBm for Antenna gain <6dBi

Test equipment used: ETSTW-RE 055

3.3 RF Exposure Compliance Requirements

FCC OET Bulletin 65 Edition 97.01 determines the equations for predicting RF fields and applicable limits.

The prediction for power density in the far-field but will over-predict power density in the near field, where it could be used for walking a “worst case” or conservative prediction.

$$S = \frac{P G}{4 \pi R^2}$$

S – Power Density

P – Output power ERP

R – Distance

D – Cable Loss

AG – Antenna Gain

Item	Unit	Value	Remarks
P	mW	221.31	Peak value
D	dB		
AG	dBi	4.9	
G		3.09	Calculated Value
R	cm	20	Assumed value
S	mW/cm^2	0.136	Calculated value

Limits:

Limit for General Population / Uncontrolled Exposure	
Frequency (MHz)	Power Density (mW/cm^2)
1500 – 100.000	1.0
