Dear Mr. Dayhoff,

With reference to your inquiry ref # 25452, please find the following response:

1. The only data transfer is that of a very short duration 24-bit control code. This code is used to allow function of the device as part of a home security alarm system. No other form of data is transmitted by radio. All other data transfer is by wire-line.

If you should have any additional questions, please do not hesitate to contact me.

Yours sincerely,

Bandele Adepoju
