

Subject: Model 610-01100
Date: March 14, 2013

This is to clarify that the Model 610-01100, TruBlue™ Remote Monitoring System Node (requested FCC ID: Q9H-TRMSNA) includes in its design two intentional radiator modules. These modules carry their own FCC/IC modular approval. These devices are:

Manufacturer	Part Number	FCC ID	Description
Microchip	MRF24WB0MA	W7OZG2100-ZG2101	Wifi Module w/ PCB antenna
Digi International	XT09-MI	MCQ-9XTENDB	9XTEND 900MHz radio, MMCX connector

A unique approval and FCC ID, Q9H-TRMSNA, has been requested for this device due to the collocation of the two transmitting antennas within the device. The modules listed above are being used as prescribed by their existing grants, with the exception that they are being co-located.

Sincerely,

A handwritten signature in black ink, appearing to read "David Marsell", written in a cursive style.
