Attention: Application Examiner

RE: Justification of Label in Battery Compartment  
Applicant: Cross Match Technologies  
FCC ID: Q9YSENTRY5

To Whom It May Concern:

Request is hereby submitted by Cross Match Technologies, Inc. to allow placement of the host label with FCC ID and model number identification in the battery compartment of the Verifier Sentry device. The device is ruggedized and may experience harsh handling and extreme conditions, including water that could result in damage or removal of the label if located on the exterior of the device. By locating the label in the battery compartment it will be protected from these environmental conditions.

The request is based on meeting the requirements in section 4 of the KDB 784748 D01 "Labelling Part 15 & 18 Guidelines v08".

- The device is handheld.
- The FCC identifier is visible at the time of purchase due to the battery not being installed.
- No tools are required for access to the battery compartment and the FCC label is installed on a permanent part of the device.
- The FCC ID and Model Number are on the label and meet the labelling requirements.

Sincerely,

Donald R. Dale  
Staff Electrical Engineer  
Cross Match Technologies
