RE: Declaration of Similarity
FCC ID: QABTSR608V930
IC ID: 12009A-TSR608V930

To Whom It May Concern:

Please be advised that the models TSR/300/608, TSR/300/108, TSR/200/608, TSR/200/108, TSR/100/608 and TSR/100/108 are electronically identical, all RF measurements and test results are exactly the same. All 6 versions are built to one identical hardware and Firmware build.

The TSR/*00/608 is classed as multi smart, this means that it can work with most 13.56MHz RFID card formats i.e. Picopass, iClass, Mifare, Desfire, etc. When the TSR/*00/608 is connected to an AC2000 system it automatically downloads the card database and card format from that system. This is the point when the card format to be used is set in the TSR unit.

The TSR/*00/108 is identical in both hardware and firmware to the TSR/*00/608 but is only marketed for use with iClass / iClass SE card formats.

The differences between the models are purely functional and are controlled by product licensing codes.

The TSR/100/*08 is the base level intelligent access terminal with normal access control functionality.

The TSR/200/*08 is the mid range level intelligent access terminal with normal access control and additional VoIP intercom facility enabled.

The TSR/300/*08 is the top level intelligent access terminal with normal access control, VoIP and additional Remote Applications enabled.

Thank you for your attention to this matter.

Yours faithfully

Company: Controlled Electronic Management Systems Limited
