Request for Permissive Change Class II FCC ID QAM011

We hereby request pursuant to 47CFR2.1043 a Class II permissive change for the Promethean Product Activexpression FCC ID QAM011.

Details of the change:

This application is to include an alternative microprocessor on the Activexpression due to shortages in supply of the existing device. The revised part number is AT91SAM7S256 manufactured by Atmel. No other hardware changes have been made. The processor is pin compatible with the existing AT91SAM7S128 and the difference between the two devices is the amount of memory available.

The product has been tested by TRL Compliance Limited and a test report is submitted with this application.

Sincerely,

Bryan Lofthouse
Compliance Engineer
