

Navystar (Ngai Shing) Industrial Co., Ltd.

Model: 80031T-27

15 Feb, 2003

CIRCUIT DESCRIPTION:

In transmitter IC1 TX2 to switch code modulation, key S1 is forward, key S1 is right, key S1 is left. Q101 is 27MHz crystal oscillator. Q102 input mix modulation and 27Mhz crystal oscillator output to L103 and antenna.

In receive Q6 & T1 to detector the modulation, IC RX2 become amplifier of decode forward drive motor Q2, Q3 and Q4 to forward, right drive motor Q12, Q9 and Q7 to right, left drive motor Q6, Q8 and Q10 to left.
