"SOLUTIONS FOR THE WIRELESS FUTURE"

FCC ID: NBZNRM-6832
Applicant: Novatel Wireless Technologies Ltd.
Equipment: Wireless CDPD Modem
Model: Minstrel III
Standard: FCC Rules and Regulations Part 2.1046

ENGINEERING SUMMARY

This report contains the results of the effective radiated power (ERP) measurement performed on a Novatel Wireless Technologies Ltd. Wireless CDPD Modem, Minstrel III. The measurements were carried out in accordance with the FCC Rules and Regulations Part 2.1046. The product was evaluated for ERP when it was set at the maximum power level.

The DUI was tested for ERP at high, middle, and low frequencies with the maximum ERP obtained at channels (Nos. 991 and 799) with the frequencies being 824.00 MHz and 849.00 MHz respectively. The test data is presented in this report under the section :Test Results.

Summary of the Results

Test Description	Page No.	Test Set-up Figure No.	Results Summary
RF Power Output as Radiated Ref. Paragraph 2.1046	8	1	Passed

INTRODUCTION

General

This report describes the results of the effective radiated power (ERP) measurement conducted on an Novatel Wireless Technologies Ltd. Wireless CDPD Modem, model Minstrel III.

Test Facility

The tests were performed for Novatel Wireless Technologies Ltd. by APREL Laboratories at APREL's EMI facility located in Nepean, Ontario, Canada. The laboratory operates an (3m and 10m) Open Area Test Site (OATS). The measurement facility is calibrated in accordance with ANSI C63.4-1992.

A description of the measurement facility in accordance with the radiated and AC line conducted test site criteria per ANSI C63.4-1992 is on file with the Federal Communications Commission and is in compliance with the requirements of Section 2.948 of the Commissions rules and regulations.

APREL's registration number is 31040/SIT (1300F2)

APREL is accredited by Standard Council of Canada, under PALCAN program (ISO Guide 25). APREL is also accredited by Industry Canada (formerly DOC) and recognised by the Federal Communications Commissions (FCC).

Standard

The evaluation and analysis were conducted in accordance with FCC Rules and Regulations Parts 2.1046 and the appropriate limits.

Test Equipment

The test equipment used during the evaluation is listed in Appendix A with calibration due dates.

Environmental Conditions

Measurements were conducted in open area test site.

- Temperature: 10 °C ± 2
- Relative Humidity: 30 - 50 %
- Air Pressure: 101 kPa ± 3

MANUFACTURER'S DATA

FCC ID No: NBZNRM-6832

Equipment Type: Wireless CDPD Modem

Model: Minstrel III

Reference: FCC Rules and Regulations Parts 2 and Part 22

Manufacturer: Novatel Wireless Technologies Ltd.

Power Source: DC Battery

Development Stage of Unit: Production

GENERAL SPECIFICATIONS

1. Frequency Range: 824 to 849 MHz (Transmitter)
2. Rated Transmitted Output Power: 600 mW
3. Frequency Tolerance: 2.5 ppm
4. Type of Modulation: GMSK
5. Emission Designators(See 47 CFR § 2.201 and §2.202) 28K8FXW
6. Antenna Impedance: 50 Ohms

CHANNELS TESTED

Channel	991 (Lo)	824.000 MHz
Channel	383 (M)	836.490 MHz
Channel	799 (M)	849.000 MHz

TEST RESULTS

FOR

Effective Radiated Power (ERP)

of

Wireless CDPD Modem

Minstrel III

Novatel Wireless Technologies Ltd.

Test: RF Power Output as Radiated (ERP)

Ref.: FCC Part 2 paragraph 2.1046

Criteria: N/A

Set-up: See Figure No. 1.

Equipment: See Appendix A.

Procedure: RF Power Measurement by Radiated Method (ERP):

Test site: The radiated RF power measurement was taken at APREL Laboratory's open area test site (OATS). This open area test site is calibrated to ANSI C63.4 document and a description of the measurement facility is on file with the Federal Communications Commission and is in compliance with the requirement of Section 2.948 of the Commissions rules and regulations.(FCC File No.: 31040/SIT)

The test was set-up as illustrated in Fig.1. The Wireless CDPD Modem Minstrel III was configured to operate at maximum power with carrier **unmodulated**. The equipment under test was placed on a turntable positioned 3 m away from the calibrated receiving antenna, which in turn was connected to the spectrum analyzer.

For each transmitter frequency, the received signal was **maximised** by rotating the turntable and adjusting the height of the receiving antenna. To obtain the actual ERP, the Wireless CDPD Modem Minstrel III was replaced by a vertically polarised half-wave dipole antenna fed by an RF power amplifier and signal generator. The center of the dipole antenna was placed in the same location as the Wireless CDPD Modem Minstrel III. The signal generator level was adjusted until the reading on the spectrum analyzer was identical to that obtained when the Wireless CDPD Modem Minstrel III was on the turntable. The output of power amplifier was disconnected from the substitute dipole and connected to an RF power meter. **The effective radiated power was read directly from the power meter.**

The process was repeated for two more channels.

Results: See Table 1

Figure 1.a Test set up for the Radiated Power (ERP) Measurement in OATS (not to scale)

Fig. 1.b APREL's OATS (Open Area Test Site)

Figure 1.c Test set up for the Radiated Power (ERP) Measurement in OATS (not to scale)
The Handheld wireless modem is replaced by Reference Dipole Antenna.

Table 1.
RF Output Power Measurement
ERP
Power Level : 0

Channel No.	Nominal Transmit Frequency	Manufacturer's Rated Output Power	Measured Output Power (ERP) (power level: 0)	(ERP) (power level: 0)
	(MHz)	(W)	(dBm)	(W)
991	824.000	0.6	28.2	0.661
383	836.490	0.6	27.5	0.562
799	849.000	0.6	28.2	0.661
