Dear Dennis,

Thank you for your prompt reply and e-mail to Tim.
As for Modem, the antenna is professionally installed and thus
meets the antenna requirements of FCC 15.FCC 15.203.
We will add the above statement to test report. The revised test report
will be uploaded to your website later today.

Regarding the readings above 1GHz, we confirm that they are basically noise
floor and test equipment noise.
In addition, thanks for the advice about restricted band.

Best regards,

Yukari Ito
