Dear Dennis,

We noticed that the anntenna issue is related to both equipment.
We have already revised both test reports for Station Modem and Mobile
Modem. Later I will upload the reports to your website.
As for use manual, please wait until we obtain revised one from Murata.

Yes, you can remove the word, "station" from my e-mail.

Best regards,

Yukari

Thanks for the info Yukari

I have emailed Tim and let him know the device is granted. And that as soon as
I received info from you I would grant the other.

The only thing I need now is the statement about the antenna either being
professionally installed or a statement that the antenna uses a unique antenna
connector. I can accept that the readings above 1 GHz are noise as you stated.
