A photograph of the ATM-G91342 circuit board, which is green and populated with various electronic components. A large white rectangular component, likely a display or sensor, is mounted on the right side. The board is shown next to a ruler for scale, with markings in centimeters. The text "ATM-G91342" is printed in large black letters above the board. The board features several integrated circuits, resistors, and capacitors, with labels such as "ON", "OFF", "HT", and "CL" visible. A small red component is also present on the right edge.
