DotPhone3000

Chapter 2. DotPhone3000 Installation

Usage Environment

1) Requisites

Computer environment below is absolutely needed for DotPhone3000.

- Operating system: Windows 98, 98SE, 98ME, Windows 2000 Pro, Windows XP, DotPhone3000 can be used in the operating system supporting USB.

- Internet environment: ISDN, Cable Modem, ADSL, LAN.

The computer should be connected to internet to utilize DotPhon 3000's Internet phone function. DotPhone3000 executes internet phone function over the internet, so that if a computer is not connected to the internet, it's impossible to do internet phone function.

● Cautions

Windows 95 and Windows NT don't support USB. Under using an internet shareware, internet phone may not be provided according to kind of internet shareware.

(Please inquiry at the internet shareware company) (reference p. 24)

DotPhone3000 Device environment

DotPhone3000 uses USB communication and a computer power source with no special power supply. It's possible to run without a sound card in the existing computer by installing USB sound device. Installed USB device is as below.

1) USB Root Hub

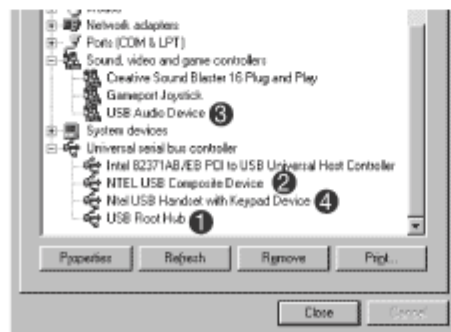

2) USB Composite Device (basic device)

3) USB Audio Device

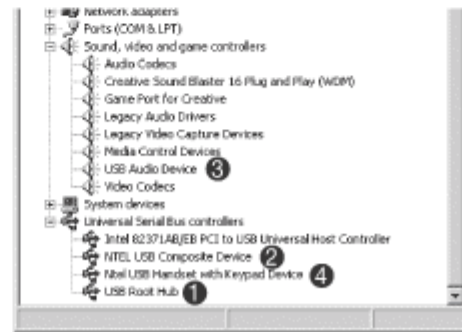

PNP device basically provided by Window 98 and sound device supporting DotPhone3000.

4) Ntel USB Handset With Key pad Device

Device for driving telephone dials, automatically installed including installation disc. Telephone dials can operate only after this device is installed.

Control Panel-system-devices (Windows 98)

Control Panel-system-H/W-devices(Windows 2000)

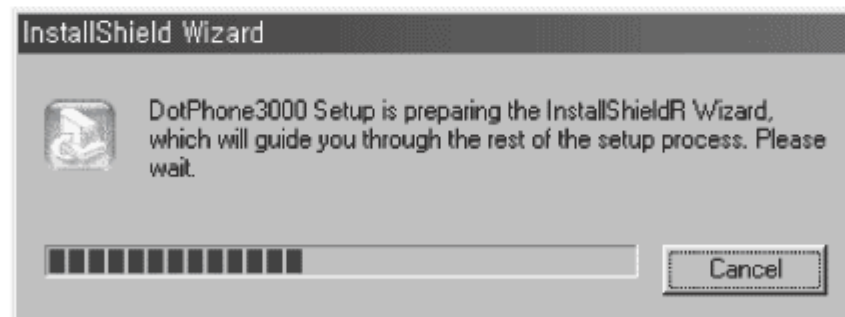

Program Setup

Please set up DotPhone3000 program before connecting a telephone to the computer's USB port. DotPhone3000 program should be set up before connecting telephone, so that driver can be installed.

- 1) Please put the CD included in this product into CD ROM drive, and it will automatically start to set up. (allowed to directly open the Windows Explorer, and click setup.exe file in CD ROM drive) for example) D:\setup.exe

The setup process is being prepared.
Please Wait and the setup screen will appear.

DotPhone3000

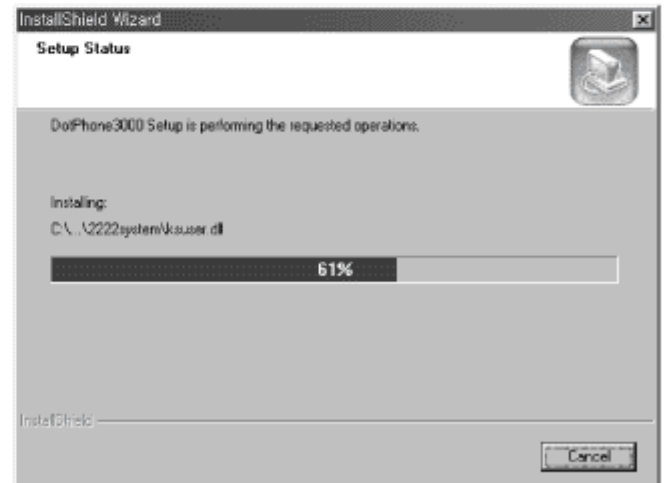

2) If your telephone is connected to USB port, get rid of it from USB port.

Click the **OK** button.
Provided that this screen is
executed at the first setup.
If DotPhone3000 is
connected, get rid of it right
now

3) File Copy

If preparation above is completed,
file copy'll begin. After it finished, all
setup gets under completion.

DotPhone3000
