Subject: C.Art Limited metrak #12398
Hi Alice,

Technical review of the this and the application for Ngai has been completed. Ngai is fine and that grant should be forthcoming tomorrow. The RT for C. Art Limited is below, and as soon as you answer this, this too can be granted.

1. Page 20 of 22, Appendix C of the Test Report states that the EUT is a 2 button device. This is not the case- it is automatically activated by an IR Sensor. Please correct, and verify compliance with the 5 second limit for transmission of Section 15.231(a)(2).
