

# User Manual

Bluetooth Headset

WICOS201

## **INTRODUCTION**

Wicos201 & Wicos202 is a Bluetooth Headset based on Bluetooth wireless technology.

Please carefully read this Manual before using your Headset.

When can I use my Headset?

You can connect your Headset, WICOS201 & WICOS202 to your mobile phone when you are at the office or in the car. This Manual focuses on how to use the Headset with your mobile phone. The phone can be tucked away in your pocket or in a bag. You can handle incoming and outgoing calls, and adjust the volume, using the volume key on the Headset.

Preparing the Headset.

To be able to use the Headset (WICOS201 & WICOS202) together with a mobile phone, you need to have a Bluetooth mobile phone (WICOS202), or a Non-Bluetooth mobile phone connected to a Phone Adapter (WICOS201)

## **FCC Statements**

Pursuant to part 15 of the FCC Rules These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures;

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio TV technician for help.

**FCC Caution :** *Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.*

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION

(Between Cradle and Plug in Charger)

## **HOW TO USE**

### **Getting Started**

Before you start using the Headset with a mobile phone for the first time, you should:

- Charge the Headset in the Cradle and the Phone Adapter in the Charging Holder
- Decide on which ear you want to wear the Headset (It? delivered for left-ear use)
- Please refer More Convenience (P.16)

### **Charging**

The Headset (& Phone Adapter) comes with a built-in rechargeable Li-Polymer battery.

The battery is not fully charged when you buy the Headset

We recommend that you charge the Headset until the indicator light turns green before using it for the first time. Put the Headset into the Cradle to charge it and also need to charge the Phone Adapter Battery in the Charging Holder

- It takes 1.5 hours to fully recharge the battery
- When the battery is fully charged, the indicator light on the Cradle (or, on the Charging Holder) turns green

### **How to charge the battery**

Connect the Charging Connecting Cable to both the connecting holes on the Cradle and

the Charging Holder

Insert the Headset into the charging cradle as shown in the picture.

Please make sure the connector pins are aligned with the connector holes in the Headset

To remove the Headset from the cradle, slide the release catch backwards and lift the Headset up.

Connect the plug in Cigar-code into the Cigarette lighter in the car

Press the Power button on the charging holder

Insert the Phone Adapter into the charging holder as shown in the picture

- At the Office

Connect the A/C power adapter to the charging cradle and to the charging holder

#### **Additional Information**

Read this information before using your Bluetooth Headset

Guidelines for safe and efficient use

### **Product care**

Please note only Wicos Co.,Ltd. Partners should remove or replace the battery.

- Do not expose your Headset to liquid or moisture or to humidity
- Do not expose your Headset to extreme high or low temperature
- Do not expose your Headset to lit candles, cigarettes, or cigars, or to open flames etc.
- Do not drop, throw or try to bend the product as rough treatment could damage it
- Do not attempt to disassemble your Headset. The Headset does not contain consumer

serviceable or replacement components. Only Wicos Co.,Ltd. Service Partners should

perform service.

Do not keep the Headset in an area prone to dust and dirt. Only use a soft damp cloth

to clean your Headset

If you will not be using the Headset for a while, store it in a place that is dry, free from

damp, dust and extreme temperatures

### **Radio frequency exposure**

Your Bluetooth Headset is a radio transmitter and receiver. When in operation, it communicates with a Bluetooth mobile device by receiving and transmitting radio frequency (RF) electromagnetic fields (microwaves) in the frequency range 2400 to 2500MHz. The output power of the radio transmitter is low, 0.001 watt.

### **Driving**

Check the laws and regulations on the use of mobile phones and Headset in the areas where you drive.

### **Electronic equipment**

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment is not, therefore:

Do not use your Headset near medical equipment without requesting permission. If you are using any personal medical devices, e.g. a pacemaker or a hearing aid, please read in your mobile phone? User? Guide for further information.

### **Aircraft**

Turn your Headset OFF before boarding any aircraft. To prevent interference with communication systems, you must not use your Headset while the plane is in the air.

## **Battery information**

Please note that only Wicos Co.,Ltd. Service Partners are able to remove or replace the battery in a proper way.

A rechargeable battery has a long service life if treated properly.

A new battery or one that has not been used for a long period of time could have reduced capacity the first few times it is used.

Do not expose the battery to extreme temperatures, never above +50 degree. For maximum battery capacity, use the battery in room temperature. If the battery is used in low temperatures, the battery capacity will be reduced.

## **Warranty**

If, during the warranty period, this Headset fails to operate under normal use and service, due to improper material or workmanship, Wicos Co.,Ltd. Service Partners will, at their option, either repair or replace the Headset in accordance with the terms and conditions stipulated here in.

## **Our Warranty**

Wicos Co., Ltd. Warrants this Headset to be free from defects in material and workmanship at the time of its original purchase by a consumer, and for a subsequent period of one (1) year.

- This warranty does not cover any failure of the Headset due to normal wear and tear, or

due to misuse, including but not limited to use in other than the normal and customary

manner, in accordance with Wicos Co.Ltd? instructions for use and maintenance of the

Headset. Nor does this warranty cover any failure of the Headset due to accident, modification or adjustment, acts of God, improper ventilation or damages resulting from

liquid.

- This warranty does not cover Headset failures due to improper repair installations, modifications or service performed by a non Wicos Co., Ltd. Service Partners.
- Tempering with any of the seals on the Headset will void the warranty.

Some countries/states do not allow the exclusive or limitation of incidental or consequential damage, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

The warranty provided does not affect the consumer? statutory rights under national legislation in force, nor does it affect the consumer? rights against the dealer arising from their sales/purchasing contract.

### **Supported Bluetooth functions**

This Headset supports the Headset profile.

In France Bluetooth is authorized in the whole band 2.4GHz (2400-2483.5MHz) with 10mW for indoor use and 2.5mW for outdoor use, but for more power you have the upper band 2446.5-2483.5 MHz which is opened until 100mW but only for indoor use.
