Response For FCC Application

2004/9/9

RE: Chi Mei Communication System Inc.

FCC ID: QDJ-0406CHIA1 PC

1. No matching component was changed, only antenna itself is fine tuned, so conducted emission should not be necessary.
2. No any schematic or block diagram or part list is changed.
3. The probe factor is updated.
4. The EUT is right under the area scan. The area scan does cover all the EUT no matter it is open or close.
5. The Z-axis plottings are included in SAR report.

Sincerely Yours

Daniel Lee

EMC/SAR Manager
