Subject: Broadcom Corporation, FCC ID: QDS-BRCM1019, Assessment NO.: AN05T4965, Notice#1

Question #1: Based upon "Worst Case Power and Bit Rate Setting" table in section 6.6 of the test report, PSD was measured with different Power setting at certain channels. However section 8.1.6 only reports the test results at channel 1, 6, 13, without specifying the gate average power setting. If all the PSD measurement was done with same setting: 19dBm, please update the tables in section 6.6. Otherwise, please revise section 8.1.6 to provide additional test data at channels with lower power setting. Please indicate power setting on the report for each PPSD plot.

[Danielle] See revised report as attached.

DTS Report.pdf...

Question #2: Please redo the MPE calculation to report power density in mW/cm² and update the test report.

[Danielle] See revised report as above.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
