Ref: FCC Class II Permissive change for FCC ID: QDS-BRCM1022
(Original Grant date: 06/14/2006)
Applicant: Broadcom Corporation

Dear Examiner,

This is to request a Class II permissive change for FCC ID: QDS-BRCM1022, originally granted on 6/14/06.

The major change filed under this application is:

1. Addition of the 3rd antenna connector. On the original version, the trace layout was there, but not populated. There are still only two TX and two RX antennas active at any point in time. The diversity selects between the two best antennas from Main, Aux and Middle.
2. The power amp has been modified from a two antenna nFEM to a three antenna nFEM. The associated layout and filter circuitry is the same. The power levels of the BCM94321MC with new PA are identical to those in the original filing, as detailed in the operational description.

Testing was performed to ensure continued compliance.

If you have any questions regarding this application, please feel free to contact me.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Dan Lawless', is written above the printed name.
