Dear Thu and Claire,

You are listed as the Technical Contact and Authorized Agent for the above referenced TCB application. The following item(s) need(s) to be resolved before the review can be continued:

The Users Manual exhibit submitted for the host devices into which this device will be installed indicates Bluetooth and WWAN co-location (possible) and does not address any RF Exposure guidance to the user. Please explain the co-location and update the manual for RF Exposure guidance.

<answer>1.regulatory document is revised.

Client usually uses generic regulatory statement in all user guides but will post the applicable

regulatory document on their web site. So the revised regulatory document will be posted on web site

for users' reference.

Client would like us to post both old manual and new regulatory file in FCC website.

2. FCC C2PC letter is updated to expand scope, pls see updated letter attached.  
We are still waiting for updated IC C2PC letter.
3. Three EMC reports are revised to reflect the C2PC letter change.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
