Attn: Certification Bureau

Ref: Original application for IC Certification No: 4324A-BRCM1064

Original application for FCC Certification No: QDS-BRCM1064

Applicant: Broadcom Corporation

Dear Examiner,

We, **Broadcom Corporation**, hereby declare that the model BCM94331CD, IC ID: 4324A-BRCM1064 has the following frequency scanning plan:

Active scan on 2412-2462MHz, 5150-5250MHz and 5725-5850MHz.

Passive scan on 2462-2472MHz, 5250-5350MHz, 5470-5725MHz

The model BCM94331CD will not allow the user to select any non-Canadian frequency.

The device maintains a list of DFS channels/frequencies and does not allow "Ad-Hoc", WiFi direct or any other transmission on non-Canadian frequencies or DFS frequencies including 5600-5650MHz, unless under the control of a master device.

"Ad-Hoc" and WiFi Direct are usable on legal Canadian frequencies, in which there are no DFS requirements.

This includes transmissions for beacons, ad-hoc and peer-to-peer modes.

If you have any questions regarding this application, please feel free to contact me.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Daniel Lawless".

Daniel Lawless
