

# TEL•TRON *Companion One*<sup>®</sup>

## Call Stations

### *Wireless Series*

#### Description

Tel-Tron wireless call stations allow for wireless activation of an emergency call from anywhere within a resident's apartment or common area. These transmitters can be used within a full wireless system, within a telephony system, or as an added feature to a Direct Connect system.

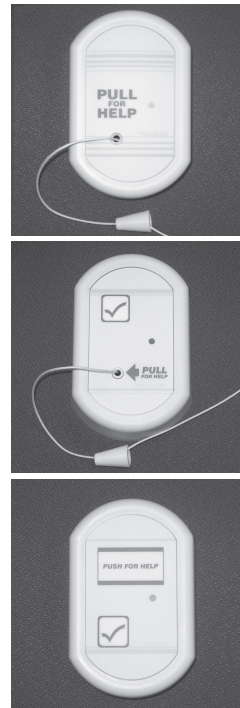

These transmitters, when activated, send a signal to either a WRMA wireless receiver on a wireless system, to a TVTA or TVCA which acts as a wireless receiver on a telephony based system, or a WARB wireless receiver on a Direct Connect system.

All wireless call stations are surface mounted to a wall and are useful where a fixed location to call for help is desired.

The **WECA Wireless Pullcord Station** is activated by pulling the pullcord. This transmitter is useful in areas, such as bathrooms and bedrooms, where a pullcord reaching to the floor is desired.

The **WRCA Wireless Pullcord Station** is identical to the WECA except that it also has a dual-purpose push button that can be used for resident check-in and/or to reset the call from the station.

The **WRTA Wireless Touchpad Station** is activated by pressing the "Push For Help" button. The WRTA also has a dual-purpose push button that can be used for resident check-in and/or to reset the call from the station.

#### **WECA**

*Wireless Pullcord Station*

#### **WRCA**

*Wireless Pullcord Station  
With Check-In*

#### **WRTA**

*Wireless Touchpad Station  
With Check-In*

#### **FCC ID: QE2-WECA**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two Conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

#### Specifications

Color	White
Mounting screws	2 #6 x 1" Pan Head, Phillips or double-sided tape
Gang	1-gang surface mount
Dimensions	5" x 3 1/4" x 1 1/4"
Battery	CR2032, 3V

#### Compatibility

Wireless System	
WRMA	Wireless Receiver
WAPA	Wireless Network Access Point
Telephony System	
TVTA	CarePartner Telephone
TVCA	PhoneMate Communicator
Direct Connect System	
WARB	Wireless Receiver
