Hi Alice,

Technical request is below. Please respond.

RT question:

1. Based on our technical review of the application, it appears as though the test report submitted for this device is identical to that provided for FCC ID:QE813001TX27. While the schematic diagrams for these 2 devices are identical, the pcb layouts are quite different, which could result in different emission levels. Was a separate test performed on this device? If not, please do so, and submit the new test report.

Regards,

Marianne
