2. Press the Menu button to display "Preview" and "Setup". Press the PLAY/OK button on "Setup".

3. When the Picture Taking Settings screen appears, move to the field you want to set, and select the desired setting for that field using the left/right button.

- Mode: Select Movie or Still mode.
- Speed: In movie mode, you can select the rate of picture taking in units of frames per second.

■ The maximum frame rate is 5 frames/sec for 320x240 resolution and 2.5 frames/sec for 640x480 resolution.

- Size: Select the picture taking resolution, either 640x480 or 320x240.
- Sticker: Select a "sticker frame" – a frame that will be put on your pictures at the time of capture.

■ You can download new sticker frames using the Magic Sync software.

Using PIMS

PIMS Mode

■ You can also manage your PIM data and synchronize with your PC using the Magic Diary software.

Display

Features
