17 July 2002

FCC

SUBJECT: MAZELTELECOM CO., LTD. FCC ID: QEXMTW9000

To Whom It May Concern:

The original certification for this EUT was issued with a frequency range of 914.5 to 915.5MHz because that was all that the test data supported. The applicant complained and they were informed of the requirements of 15.31 and they then retested at the band edges and the additional data was supplied.

Sincerely,

Sid Sanders
