Modular Approval Letter

Date: 2012-10-25

The Device, FCC ID: QFHC-IV3, is seeking FCC authorization as a modular transmitter. The EUT meets the requirement for modular approval as detailed in FCC Public Notice DA 00-1407. Compliance to each of the requirements is described below:

1. The modular transmitter have its own RF shielding. Please refer the product photo.
2. The modular transmitter have buffered modulation/data inputs, the buffer IC is W9825G6JH
3. The modular transmitter have its own power supply regulator, DC 5V input should be converted to 3.3V by the power regulator Circuit.
4. The modular transmitter comply with the antenna requirement of section 15.203 and 15.204(c) , the modular have a 0.5dBi printer antenna printed on the PCB.
5. The modular transmitter be tested in a stand-alone configuration => the modular be supplied by DC power Supply, and the control data cable was longer than 10cm connecting the RJ45 port of compute at testing.
6. The modular transmitter have a label on the modular's shielding, labeled with its own FCC ID number: QFHC-IV3.
7. The modular transmitter comply with any specific rule or operating requirements and the provide adequate instruction along with the module to explain any such requirements.
8. The modular transmitter comply with RF exposure requirements.

Sincerely,
