Hi Alice,

Ok I think I looked really good this time, and below are the admin issues:

1. Label - If the label info was inscribed into the device where you were showing the location, the photo was too dark to be able to see the detail. Please submit a clearer photo, or if you are using a separate label and maybe just forgot to attach, please send that.
2. 15.19 statement - to be included on label above.
3. 15.21 statement - I looked good, I thought, and I didn't find this in the manual.
4. Test report - The FCC ID on the front of this reads FCC ID:XXX94572000602. So we don't have any confusion with the FCC, please revise this front page and send that revised page or another report

Any questions, please just ask. Have a good day.

Regards,

Marianne.
