RE: FCC ID: QGZB2000_ATCB005302
Attention: Dave Waitt

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the operational description states that a "Bluetooth coexistence interface is also supported." Please advise if this device contains a BT transmitter or if it is a DTS only application.
2. Please note that the operational description states that the device operates in the 5GHz bands (see section 2.3 of the operational description). Please explain if this device does operate in the 5GHz bands. If it does, please provide appropriate data and correct the appropriate documentation. If the operational description is a generic description for a family of devices, please clearly indicate in the document which specific sections do and do not apply to this device.
3. Please note that the device has a clip called the "universal clip". This clip appears to easily allow the device to be worn on the body. Please also note that the output power of the device is over 300mW. Please also note that the manual clearly indicates that an external headset containing a speaker and microphone can be used with the device, also clearly indicating possibility of use on the body. Please also note that the manual states SAR testing has been performed. Please explain why Body SAR testing was not performed/provided on/for this device. If no reasonable justifiable explanation can be provided, please provide the Body SAR report.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
