

March 16, 2009

This report is in support of an application by Technalogix Ltd. for certification of transmitting equipment used for UHF digital television systems. Specifically, Technalogix is requesting certification of the Technalogix TLUD-30 ATSC compliant digital television transmitter.

The TLUD-30 supplies a 30 watts ATSC television signal on any of the UHF television channels.

The emission designators based on FCC Part 73.682(d) transmitters are 6M00K1D.

Should you have any questions, please do not hesitate to contact Technalogix:
