

Response to TCB Findings

Q: On Page 7 (2.3.2) of the report, it has been stated that the measurement distance for radiated emissions was 10 meters. The Qpeak limits that these readings are compared to are 3 meter limits. Could you please clarify the comparison method and measurement distance for us.

Response: On Page 7 (2.3.2) of the report the measurements are performed at 10 meters and the Qpeak results are extrapolated with 15.31 requirement (20dB/decade) for comparison with 3 meter Qpeak limits. (See note below table on page 7)
