

**Class II Permissive change filing for addition of a new antenna to be used with the FCC ID:
QHKGMEOL400CHAN4**

This Class II Permissive Change filing is for adding a new antenna (SCH400) to FCC ID: QHKGMEOL400CHAN4. The SCH400 "Light Chute" antenna is specifically designed to read garments at an item return station in laundry distribution center. No other antenna in TAGSYS product range offers the possibility to be wall mounted and read a 15mm diameter RFID Tag presented in any orientation at normal hand motion speed. Furthermore its use of PCB boards copper tracks as radiating loops and Epoxy boards to make the structure is a novel and innovative construction compared to standard coaxial or copper wires structure.

To whom it may concern.

Franck D'ANNUNZIO
TAGSYS S.A.
180, Chemin de Saint Lambert
13821 La PENNE-SUR-HUVEAUNE – France

Signature :

A handwritten signature in black ink, appearing to read "Franck D'Annunzio", is written over a diagonal line. The signature is somewhat stylized and includes a small arrow pointing upwards and to the right at the end of the line.
