- Press [SEND] or just wait for 8 seconds to make a call.

Problem	What To Do
There is no indication on the LCD screen	Make sure the terminal is turned on. If the switch is on, turn off the terminal and then turn it on again.
No Service message is displayed on the LCD screen.	The WLL terminal must be placed in the location where service coverage is available. If necessary, move the terminal to the serviced location.
Your terminal beeps or you can hear nothing in the handset.	Your handset is not properly placed. Place the handset normally.
Battery LED is turned off, and the terminal beeps periodically.	The backup battery is discharged. Switch to the external power supply..
There is no ring when a call comes.	The ringer is switched off. Press [UP] button several times to adjust the ringer volume

In case that the simple remedy steps does not work help with Terminal, contact to the local agency from where you have purchased the product, or a service center and or a qualified technician will to solve the trouble.
