We, Huawei Technologies Co.,Ltd.

Declare that:

E270/E870 support WCDMA2100/1900/850 three bands.

We just enable the HSUPA on band 1. And for band 2 and band 5, we disable the HSUPA function by software.

So,

1.  In our label and user manual, E270/E870 support the HSPA (Release 6)

    ----Because E270/E870 was sold in Europe now and for band 1 E270/E870 support the HSUPA.

    ----In user quick start, it is declared we do not support the HSUPA on band 2 and band 5 now.

2.  E270/E870 apply for the FCC ID without HSUPA. We do the test according to the R5 specification.

    ----Because E270/E870 do not support the HSUPA function for band 2 and band 5 now.

    And the user can not use HSUPA on band 2 and band 5.

Yingzhe Li                                  Cooperation Manager
