Declaration on Electrically Identical Models

TO WHOM IT MAY CONCERN

We, Huawei Technology Co., Ltd. declare on our sole responsibility that the new model K4606 with FCC ID: QISK4606 is identical in hardware and software to the certified model E3251s-6 under FCC ID: QISE3251s-6.

The only differences between the new model and the original model are: Model E3251s-6 is equipped with WCDMA 1900 chip whereas Model K4606 is equipped with WCDMA900 chip in replacement of the WCDMA 1900 chip. Both chips are pin compatible. Neither the PCB, antenna nor the dimensions are altered.

We attest that above changing are not relevant for any RF behaviour subject to regulatory items in the GSM and WCDMA 850 MHz frequency bands. Additional Spurious Emissions measurements on representative configurations have been performed to justify. Therefore all test reports for GSM and WCDMA 850MHz bands remain applicable.

If you have any questions, please feel free to contact us at the address shown below

Sincerely,

Zhang Xinghai
EMC Lab Manager
