

FCC Statement of Compliance with RF Exposure.

This equipment has been evaluated for determination with the FCC RF Exposure requirements. From this evaluation, Tandberg certifies that this equipment when operated and used in the configurations specified in this manual, complies with the FCC Test Specifications Supplement C to OET Bulletin 65. The RF Exposure values achieved by the Voyager Lite are below the recommended level of 1.6 W/kg as averaged over any 1 gram of tissue according the FCC Rules and Regulations Section 2.1093.

The statement above will be incorporated in the instruction in lieu of or in addition to the current statement on pages B20 and B21 which covers European specifications.
