May 31, 2006

RE: FCC ID: QMNRM-193_ATCB003504
Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please provide the operational description for the device.
2. Please note that part 1 of the SAR report states that Dipole kit SN478 is on a one year cal cycle with calibration due Oct 2006. However, the calibration for Dipole kit SN478 shows calibration last done in Oct 2004 thus a due date of Oct 2005. This appears to indicate the use of equipment out of cal. Please provide data using currently calibrated equipment. Alternately, please explain the variance in the table and calibration certificate for dipole kit SN478.
3. Please provide the manual for this application.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
