CHANGES IN DESIGN – PERMISSIVE CHANGE CLASS 2

Pursuant to Section 2.1043 of the Commission's Rules, the Applicant hereby requests approval for changes in design planned for product FCC ID: QMNRM-347.

The first change is the introduction of a new plastic cover set with a different color and composition from covers used for testing in the original grant. An internal decision was made to repeat ERP, EIRP and SAR measurements.

The second change is to correct a test omission made in the Equipment Class DSS on the original grant, where conducted RF power measurements were performed using GFSK modulation only. This Class 2 change adds test results for RF power measurements for 8DPSK (EDR) modulation.

The internal conclusion was to retest different equipment classes as follows:

PCE: 2.1046(a), 2.1093, 22.913(a), 24.232(b)

DSS: 15.247

For the record, this product has not yet been introduced or marketed to the public.
