Dear Helen,

Thank you for your comment.

I would like to send revised test report in this email to clear your kind comment.
If you need more information, please inform me that.

Best regards,

Y. G. Gwon
ONETECH Corp.

Subject: Re: KMTEL Co., Ltd., FCC ID: QMTSP-150R, Assessment NO.: AN05T4740, Notice#1

Question #1: The CYY report indicates that both the transmitter (FCC ID: QMTSP-100T) and Signal Generator were used as test support equipment during the test, but the transmitter was not shown on the test setup photos. Please explain. Please also indicate clearly in the test report about the test setup, please explain how the EUT received 315 MHz signal during the test.

Please update test report or test setup photos if necessary.

>>> Notice#1  
>>>  
>>> Question #1: This device is a PC peripheral, it is also a receiver to work with a Part 15 transmitter (FCC ID: QMTSP-100T). Due to this reason, a composite filing is required: one under "JBP - Personal computer and PC peripheral", one under "CYY - Communication receiver w/Part 15 transmitter". The application is for JBP, please submit a new application for CYY. Please make sure "a typical signal or an unmodulated CW signal at the operating frequency of the EUT shall be supplied to the EUT for all tests." Your test report in this filing is not good for CYY filing.
