RE: FCC Class 2 Permissive Change  
FCC ID: QOQWT41  
IC: 5123A-BGTWT41

Dear Application Examiner

Bluegiga Technologies Oy / Bluetooth module, FCC ID: QOQWT41 and IC ID: 5123A-BGTWT41, would like to have your authorization for a Class 2 Permissive Change. The C2PC is for SF61B Cordless Scanner produced by Intermec Technologies Corp. The scanner is using WT41 closer than 22 cm from a human body. SF61B has two variants which both are tested and the test reports are in appendix of this application. The assembly of WT41 is identical in both variants. The required SAR has been measured in an accredited test house from the end product and the end product has found to be compliant to the requirement of Partial-Body Uncontrolled Exposure ( $<1.6\text{W/kg}$ ). The installation guide is provided for Intermec for installing the module correctly. The Class 2 Permissive Change is only for this particular end product.

Best regards

A handwritten signature in blue ink, appearing to read "P. Rahikkala", with a long horizontal stroke extending to the right.
