Gentlemen:

Re: FRN 0007888910; QQTM15
(Confirmation No. EA860590)

This letter supplements our letter dated May 16, 2003 attached to application form 731 filed online on May 23, 2003. That application is one of three submitted by Air Services of Cleveland, Inc. on that date, for transfer of equipment grants from Mentor Radio Co.

For those applications, we had prepared a number of documents as attachments. Not having previously made online applications, we were not aware of the format requirements and restrictions. While some of the documents were in MS Word, and a few in PDF and JPEG formats, which we now know to be acceptable, others were AutoCad drawings (DWG format) and in TIFF formats. We had selected the latter for some scanned documents because the files sizes were much smaller than for JPEG formats.

We are in the process of converting the files we could not submit to acceptable formats. These conversions should be completed within several more days. Some files are being uploaded along with this supplemental letter; others will be uploaded shortly.

Very truly yours,

AIR SERVICES OF CLEVELAND, INC.
Mentor Radio Division

Jack Streater
Engineer
