FEB 10 2012

Mr. Andy Leimer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

We have reviewed the Mentor Radio letter dated February 5, 2012 and subsequent information received February 8, 2012, regarding a request for Federal Communications Commission (FCC) certification of the very high frequency (VHF) Communications Transceiver, FCC ID: QQTM2115, which operates in the VHF band 118-137 MHz. The request is to certify the equipment for 25 kHz spacing to operate within the United States National Airspace System (NAS). Additional capabilities include 8.33 MHz channel spacing.

The Federal Aviation Administration has reviewed the data presented by Mentor Radio and has found no objection to the FCC granting certification to the FCC-ID: QQTM2115 VHF Transceiver providing, that operations in the 8.33 MHz mode will not be exercised within the NAS. The equipment will be operated under FCC Part 87 rules.

If you require any additional information, please contact Ms. Annette Allender, Electronics Engineer, Spectrum Planning and International Office, at (202) 267-3893.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael O'Brien". The signature is fluid and cursive.

for
Robert A. Frazier
Manager, Spectrum Planning
and International Group
