

OPERATIONAL DESCRIPTION
TAIWAN GOMET TECHNOLOGY CO., LTD.
FCC ID: QS6-GWD900T / QS6-GWD900R

When policemen inquire into a suspecter that policemen must read miranda card in front of him. In this moment must record audio & video by a camcorder in the patrol car.

The audio signal is transmitted by TX (Wireless microphone) of this device to RX (Receiver) installed in car, which is connected to the camcorder.

When policemen turn on the Wireless Microphone will automatically turns ON the Camcorder and the wireless Microphone is also able to trigger by the Receiver when the camcorder is recording.

Therefore, both of the video and audio sound can be recorded in the camcorder.
