主旨: Taiwan Comet Technology Co., Ltd., FCC ID: QS6-GWD910T, Assessment NO.: AN10T0788, Notice#1

Dear Jill,

Review of this application is complete. Please send replies to the following issues.

Q1: Test report page 8 indicates that the Boonton 52012 USB Power Sensor is beyond the calibration period. It appears that this power sensor was not used for this test. Please confirm.
8/26 Jill We don't use Power sensor for test. Removed the Power Sensor from test report. Please see attached file.

Q2: Please confirm that this transmitter is for handheld operation only and that it is not for body-worn operation. The transmitter output power is greater than the FCC low threshold power of 66 mW for operation in this band. Certification of this device for body-worn configuration would require SAR evaluation.
8/26 Jill The EUT is a handheld device.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender. Revised documentation should not be emailed, but instead should be submitted through 'Add Attachment' function at the UL-CCS website. Please have your Assessment Number and FCC ID/IC Certification number handy. You may use the following link: <https://cert.ccsemc.com/filing/>

Best regards
Tim Dwyer
