

Statement demonstrating that the requirements of  
Section 15.214 (d) have been met

**Mansella Ltd  
Stafford House  
33-39 Station Road  
Aldershot  
Hampshire  
GU11 1BA  
United Kingdom**

**Name: Wahed Dewan**

This is covered by Bluetooth security:

1. Each CDP handset and base is assigned a unique 48 bit long Bluetooth address.
2. Each handset and bases are 'paired' in Bluetooth speak creating a secure voice link between HS and BS.
3. The pairing process is accompanied by the use of a 4 digit (i.e. 10,000 possibilities) PIN number. This PIN number is combined with the BT address to create a 128bit link key ( $2^{128}$  combinations!), which is different each time a voice link is established.
