RE: FCC ID: QTKRM-240\_ATCB005303

Attention: Mr. Dennis Ward

Here are the replies to your comments.

1. In regards to the first photo: The Label Sticker does not cover any Electrical Circuits.

The little white Sticker cornered by the Label Sticker is a LDD Sticker (Liquid Damage Detector). The LLD Sticker is a water indicator label which changes color when in contact with water or other liquids.

This may be used by Service Centers or Operators in relation to Customer Complaints or Phone returns. The LLD Sticker does not cover any Electrical Circuits.

2. The Test Reports QTKRM-240\_EXHIBIT\_6c\_Cph\_FCC\_0731\_04\_revised.pdf and QTKRM-240\_EXHIBIT\_6f\_Salo\_FCC\_0731\_08\_revised.pdf has been Uploaded with corrections explaining that Data Transfer was active during the Tests.  
See Section 2 in the Reports.

With regards

Ernest Mayer
