RE: FCC ID: QTLRM-391_ATCB005765
Attention: Dennis Ward

Here is the answer from me relating to the questions:

1. HAC samples is different phone and because of this we have to test radiated power again. HAC report is RM-391_Salo_FCC_0750_15_HAC_22_24_output_power.pdf
2. The revised test report Exhibit_6_RM-391_Cph_FCC_0748_05_15C_outputpower_revised with adding the analyzer setting is uploaded to ATCB web.

Best Regards
Yao Shuo-Lisa
