2 TEST CONDITIONS

2.1 Operating test modes and test conditions

The equipment has been tested according to the operative conditions described in the user/installation manual provided by the manufacturer and by following reference standards :

Reference Standard:

FCC Part 15, Subpart C, Section 15.209 and 15.231

In the following table there are the operating conditions adopted during tests identified by an indicator (#..) at which has been referred the item “Operating condition of the equipment under test” of all technical sheets of the tests (see Section 4)

<i>Operating condition</i>	<i>Description</i>
<i>#1</i>	<i>Continuous transmission</i>

2.2 Test Overview

The appliance is classified as “*intentional radiator*” in conformity to FCC Part 15 Sub.C §15.201, and it is subject to “*Certification*” procedure.

The application is mainly used as remote control for door openers, activated pushing its buttons; the deactivation of RF signal happens releasing the command pressure.

It is possible to declare that the appliance it is subject to additional requirements stated in §15.231.

Prima Ricerca & Sviluppo, just on the basis of the following technical documents :

1.	Client declaration	TCF N°2190 Rev 1, Date: 23/03/2005
2.	Product Specification	TCF N°2190 Rev 1, Date: 23/03/2005

On these basis, Prima Ricerca & Sviluppo considers the basic model more critical to the derived models, from the point of view of their radioelectrical characteristics.

Therefore, all the measures performed on the basic model and carried in this test report, are completely extendable to the derived models.
