

3 Making the Remote Work With Your Receiver

1

Verify this key is installed, and continue with step 2.

2

Verify the remote antenna is installed on the back of the receiver.

3

Turn your ViP922 receiver and TV on, and select SYSTEM INFO on the receiver front panel.

4

Confirm that you see the System Information screen.

5

Press and release SAT on your remote. After a few seconds, you will hear a tone, and the remote will be listed on the screen.

6

Confirm that your remote operates your receiver by pressing remote buttons.

If this is not working, repeat **step 5**.

If the remote is still not linked to your ViP922 receiver, see [page 10](#) in this guide.
