RE: SAR Exemption information per KDB 447498 D01v05 Clause 4.3.1.1 using 5mm separation distances:

FCC ID: QVE4MELB

$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min. test separation distance, mm})] \cdot [\sqrt{f_{(\text{GHz})}}] \leq 3.0$

- $f_{(\text{GHz})}$ is the RF channel transmit frequency in GHz
- Power and distance are rounded to the nearest mW and mm before calculation¹⁷
- The result is rounded to one decimal place for comparison

[Ref: Clause 4.3.1.1]

Calculation (max power including tune up tolerance = 0.02382 mW):

$$[(0.02382 \text{ mW}) / (5, \text{ mm})] \cdot [\sqrt{2.450_{(\text{GHz})}}] \leq 3.0$$

$$0.007456 \leq 3.0$$

Therefore, the device meets the FCC SAR exemption requirements.

Sincerely,

Juan Manuel Gonzalez
