

Description of Operation

EUT is a 802.11b/g Router with 11 channels. This device provided four kind of transmitting speed 1,2,5.5, 11and 54 Mbps. The device of RF carrier is DQPSK, DB PSK and CCK. The device adapts direct sequence spread spectrum modulation. The Connector antenna was scolded on PCB provided diversity function to improve the receiving function. This 802.11b/g Router is an IEEE 802.11b & g Wireless LAN adapter. It allows your computer to connect to a wireless network and to share resources, such as files or printers without being bound to the network wires. Operation in 2.4GHz 802.11b/g Router radio transmission, the 802.11b/g Router transfers data at speeds up to 64/128-bit Wired Equivalent Protection(WEP) algorithm is used. In addition, its standard compliance ensures that it can communicate with any 802.11b & g network.
