To whom it may concern,

Schick Technologies would like to request that the following exhibits be made confidential as part of its application for authorization for its CDR Wireless product.

block diagram.doc  
cdrw\_description.doc  
parts list.xls  
schematic.pdf

The CDR Wireless system is the first wireless direct digital radiography system for use in the dental market. It is a milestone in the medical imaging arena and places Schick Technologies at the cutting edge of new product development. Therefore, Schick Technologies considers that the confidentiality of the above mentioned exhibits is imperative in its quest to maintain a technological edge in the market.

Sincerely,

Enrico Renzi.
