

Response to TCB Findings

Please confirm that HCR 800-805 has been tested in 3 orthogonal planes as it is a hand-held device

Response: The HCR 800 was tested as a hand held device in position that maximised emission (3 planes checked).

The HCC-100 manual needs to address the requirement to use the shielded USB cable with ferrite tube on it for compliance as seen in the internal pictures

Response: Supplied, see the revised user manual for HCC-100 Page 2.
